## Traders see long struggle vs high oil costs in Cebu

Cebu, Philippines (AP) — Traders in Cebu are facing a long struggle against high oil costs. The high costs are a result of global market conditions and have led to increased prices for goods and services. Traders are looking for ways to mitigate the impact of the high oil costs on their businesses.

## Autonomy if forced, ain't good. Cordillerans told

Cordillera, Philippines (AP) — Cordillerans are told that autonomy is not a good option if they are forced to accept it. The government is offering autonomy to the Cordillera region, but the people are skeptical. They believe that the government's offer is a ploy to divide and conquer the region. They are demanding more rights and freedoms for their people.

## Suu Kyi's fate uncertain as court delays verdict

MANILA, Aug. 2 — A court in Myanmar has delayed its verdict on the fate of Aung Mye Thaw, the husband of Nobel Peace Prize laureate Aung Mye Thaw, who was arrested in 1988 for his role in the 1988 anti-government protests. The court, which is part of the military government, has postponed the trial for several months, leaving Suu Kyi's future uncertain. The court is expected to announce its decision in the coming weeks. The military government has been accused of human rights abuses and has been under international pressure to release Suu Kyi and other political prisoners. The court's delay in reaching a verdict has fueled speculation that the government is trying to avoid a harsh sentence for Aung Mye Thaw.

## Police beat mourners in new unrest in Iran

TEHRAN, Aug. 2 — Police in Iran have beaten and arrested mourners in a new wave of unrest following the death of a prominent religious leader. The protests, which are part of a broader movement for reform, have been met with a heavy police response. The police have used tear gas and batons to disperse the crowds. The government has denied the reports of violence and has accused the protesters of being manipulated by foreign forces. The unrest has led to a state of emergency being declared in several cities.

Retailers cut prices of life-saving anti-gangstering 30%

MANILA, Aug. 2 — Retailers in Manila have cut prices of life-saving anti-gangstering by 30% in response to a government order. The order was issued to reduce the cost of essential medicines for the public. The retailers have complied with the order and have lowered the prices of various anti-gangstering drugs. The government has praised the retailers for their cooperation and has promised to provide financial incentives for future price reductions. The move is part of a broader effort to improve access to affordable healthcare for all Filipinos.

## Worshippers

MANILA, Aug. 2 — Worshippers in Manila have gathered in large numbers for a religious ceremony. The ceremony, which was held in a large open area, was attended by thousands of people. The worshippers were gathered to pray for the well-being of the country and its people. The ceremony was a significant event in the community and was widely covered by the media. The worshippers expressed their faith and devotion to their religion and their love for their country.

## Highways begin legal to be open to traffic

MANILA, Aug. 2 — Highways in Manila have begun legal to be open to traffic. The highways, which have been under construction for several months, are now ready for use. The government has announced that the highways will be open to traffic starting from today. The highways will provide a more direct route between the city center and the suburbs, reducing travel time and congestion. The government has also announced that it will provide financial incentives for businesses that use the highways. The highways are expected to significantly improve the transportation infrastructure in Manila.

Figure 1 displays a series of 12 grayscale micrographs showing the development of a *Drosophila* embryo from fertilization to hatching. The images are arranged in a 3x4 grid. The top row shows early cleavage stages (1-4), the middle row shows mid-stage cleavage (5-8), and the bottom row shows late-stage cleavage and hatching (9-12). Labels are present on the left and right sides of the grid.

## P36B worth of tollway projects readied

Metro Pacific subsidiary eyes NLEX, SLEX link

By [Name] | [Date]

MANILA, Philippines — Metro Pacific Tollways Corp. (MPTC) has secured a P36-billion contract to build and operate a 10-kilometer link between the North Luzon Expressway (NLEX) and the South Luzon Expressway (SLEX) in Metro Manila. The project, known as the NLEX-SLEX Link, is a key infrastructure development aimed at improving traffic flow and reducing travel time in the capital region. MPTC, a subsidiary of Metro Pacific Industries (MPI), is the lead contractor for the project, which is expected to be completed by 2010. The link will provide a direct route from the NLEX to the SLEX, bypassing the congested areas of the city. The project is a joint venture between MPTC and the Philippine government, with MPTC contributing 60% of the capital and the government contributing 40%. The link will be a toll road, with the toll rate to be determined by the government. The project is part of a larger infrastructure program initiated by the government to improve the country's transportation network. The NLEX-SLEX Link is one of the most significant infrastructure projects in the Philippines in recent years, and its completion will have a major impact on the economy and the lives of the people in Metro Manila.

**BPI reports 38% jump**  
**in first half net profit**

MANILA, Philippines — Bank of the Philippine Islands (BPI) reported a 38% increase in its first half net profit, driven by strong performance in its core banking and treasury operations. The bank's first half net profit reached P1.1 billion, up from P800 million in the same period last year. BPI's revenue for the first half of 2005 was P10.5 billion, a 12% increase over the same period last year. The bank's assets grew by 15% to P150 billion, while its deposits increased by 10% to P120 billion. BPI's strong performance is attributed to its focus on improving operational efficiency and expanding its market share. The bank's management expects continued growth in the second half of the year, as it continues to implement its strategic plan. BPI's first half results are a testament to the bank's commitment to providing high-quality financial services to its customers.

# Galoc oil production breaches 2M barrels

**By David Seng**      **Repair work stalls operators**

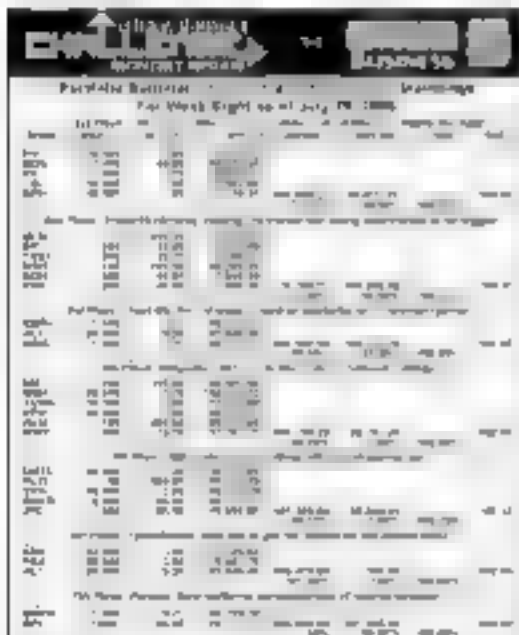

Galoc oil production has breached the 2 million barrel mark for the first time since 1994, according to a report from the U.S. Energy Information Administration (EIA). The report, released on July 26, shows that Galoc's production rose to 2.1 million barrels per day in July, up from 1.9 million in June. The increase was attributed to a combination of factors, including a surge in production from the company's new 100,000-barrel-per-day refinery, which began operations in June. Galoc's production also benefited from a decline in production from other oil fields in the region, which the EIA attributes to "repair work" that has stalled operators.

Figure 1 is a line graph titled "Percentage of respondents who believe that the U.S. should take action to reduce global warming, by age group." The x-axis represents age groups: 18-29, 30-49, 50-69, and 70+. The y-axis represents the percentage of respondents, ranging from 0 to 100 in increments of 20. The data points are approximately: 18-29 (65%), 30-49 (75%), 50-69 (80%), and 70+ (85%). The line shows a steady upward trend as age increases.

The diagram illustrates the experimental setup. A subject is positioned in front of a computer monitor. The monitor displays a visual feedback system. A starting point (S) and a target (T) are indicated on the screen. The distance between S and T is labeled as 'Distance'. The subject's hand is shown moving from S towards T. The monitor also displays a 'Visual feedback' signal.

## Coaxing diabetics to change for good

**By David E. Ho**

**B**IG NEWS: While it's true that the number of people with diabetes is rising, a new study suggests that the disease may be reversible in some cases. Researchers from the University of California, San Francisco, found that in a group of 100 people with type 2 diabetes, 33 percent were able to reverse the disease after following a strict diet and exercise regimen for six months. The study, published in the journal *Diabetes Care*, found that the participants who reversed the disease had a significant reduction in blood sugar levels and a decrease in the amount of insulin they needed. The researchers say that the study shows that it is possible to reverse type 2 diabetes, but only if the person is willing to make significant lifestyle changes. The study also found that the participants who reversed the disease had a lower risk of complications, such as heart disease and kidney failure, than those who did not. The researchers say that the study shows that it is possible to reverse type 2 diabetes, but only if the person is willing to make significant lifestyle changes.

## US design mag awards Ayala resort one of world's greenest

**A**ls die ersten Tische im Restaurant "Le Petit Paris" in der Rue de la Paix in Paris mit Gästen besetzt sind, beginnt ein Mann zu sprechen. Er ist klein und schlank, trägt eine dunkle Jacke und hat einen ernsten Gesichtsausdruck. Er spricht langsam und deutlich, während er sich leicht nach vorne lehnt. Seine Hände liegen auf dem Tisch vor ihm. Die Gäste um den Tisch herum hören aufmerksam zu, einige nodden oder lächeln leicht. Der Mann scheint eine wichtige Botschaft zu übermitteln, vielleicht eine Erklärung oder eine Warnung. Die Atmosphäre im Restaurant ist ruhig, das Licht ist warm und gedämpft.

1. The first step is to identify the key components of the system. This includes the hardware, software, and data.

By the use of the above formulae, the following results were obtained:

Time (hr)	Concentration of $\text{H}_2\text{O}_2$ (M)	Concentration of $\text{H}_2\text{O}_2$ (M)	Concentration of $\text{H}_2\text{O}_2$ (M)
0	0.00	0.00	0.00

The results show that the concentration of  $\text{H}_2\text{O}_2$  increases linearly with time, indicating a first-order reaction.

**Cinemataya Cinco delivers**

**By James Lyle**

THE CINEMATAYA CINCO THEATRE, located at the intersection of the historic and modern downtown Los Angeles, is a place where the past meets the future. The theatre is a beautiful example of the city's rich cultural heritage, and it is a place where the past meets the future.

**Maureen O'Hara stood up for her principles**

**By Jane Cummins**

MAUREEN O'HARA was a woman who stood up for her principles. She was a woman who was not afraid to stand up for what she believed in. She was a woman who was not afraid to stand up for her principles.

**Sandler plays**

**By James Lyle**

SANDLER plays a role in the new movie. He is a man who is not afraid to stand up for what he believes in. He is a man who is not afraid to stand up for his principles.
